Summary

Computer science graduate (VIT Bhopal, 2026) with backend-focused engineering experience that holds up under real load and real review, not just in a demo. Built a Java Spring Boot service where row-level locking and idempotency keys stopped **100** simultaneous orders from overselling **100** units of stock, and a Python/FastAPI finance backend on AWS EC2 backed by **128** tests at **91%** coverage. During a fintech internship, resolved **15+** production issues independently and automated a CI/CD pipeline, cutting deployment time from **45 minutes** to **5**. Comfortable across the stack – Java, Python, SQL, React – and looking for a role where I can keep building things that are correct, tested, and built to last.

Education

Vellore Institute of Technology Bhopal — Bhopal, Madhya Pradesh
B.Tech in Computer Science and Engineering CGPA: 8.4/10 — *2022 – 2026*

Skills

Languages: Java, Python, C++, SQL, JavaScript
Backend: Spring Boot, Spring Security, Spring Data JPA, FastAPI, REST API design, JWT auth
Frontend: React JS, HTML/CSS
Databases: MySQL, PostgreSQL, Redis, Flyway, Alembic
Tools & Practices: Git, GitHub Actions (CI/CD), Docker, JUnit 5, Testcontainers, JaCoCo, pytest, Agile/Scrum, code review
AI: Claude/Gemini APIs, confidence calibration, reviewing and validating AI-generated output

Experience

Software Development Intern — May 2025 – Jul 2025
Bluestock Fintech — *Remote*

- Built and shipped backend services for a live fintech analytics platform used by **2,000+** daily active users, working from loosely defined requirements in agile sprints with cross-functional product and QA teams.
- Profiled a recurring production slowdown and redesigned the database indexing and query strategy, cutting query latency by **38%** and raising peak throughput by **30%**.
- Refactored **10+** REST API endpoints for consistent contracts, predictable error handling, and fault tolerance, incorporating feedback from code reviews into every revision.
- Resolved **15+** production incidents independently, end to end, from root cause to a verified fix, communicating status clearly to the team throughout.
- Automated the CI/CD release pipeline, cutting deployment time from **45 minutes** to **5**.

Projects

Smart Order Processing Platform | *Java 21, Spring Boot, MySQL, Redis, Docker* — GitHub

- Built a multi-tier order-processing backend (controller, service, repository) with JWT auth, role-based access control, and Flyway-versioned MySQL schemas across **11** REST endpoints.
- Used row-level locking and idempotency keys so concurrent checkouts can't oversell stock: a test of **100** simultaneous orders against **100** units of stock left **0** oversold, backed by **30** automated tests at **85%** coverage in CI.

FinPilot AI – Personal Finance Backend | *Python, FastAPI, PostgreSQL, AWS EC2* — GitHub

- Built a FastAPI/PostgreSQL finance backend – transactions, budgets, analytics, PDF/CSV reporting – with **30+** REST endpoints, JWT auth, and ownership checks on every record, deployed on **AWS EC2**.
- Backed the service with **128** tests covering **91%** of the code, run automatically on every push in CI.

AI Guest Messaging Automation *(deployed)* | *Python, FastAPI, React, PostgreSQL, Claude API* — GitHub

- Built and deployed (Render + Vercel) a full-stack system that classifies guest messages from Airbnb, Booking.com, and WhatsApp and drafts an AI reply with a confidence score.
- Routed replies by confidence – **90%+** auto-sent, **60–89%** sent to a human reviewer, below **60%** escalated – so AI-generated output gets checked before it reaches anyone, with every decision logged to PostgreSQL.

Achievements

- Solved **1,472** LeetCode problems (389 Easy / 935 Medium / **148** Hard); contest rating **1758** (top **10.31%**); best global rank **2,710** in Weekly Contest 511.
- CodeChef 4⋆ across 19 rated contests; **84%** on the CodeChef Java Skill Assessment; Top 10 on the GfG Institute Leaderboard, VIT Bhopal.

Leadership

- Core Member, English Literary Association, VIT Bhopal – organized and volunteered at campus events.
